

SAVES Program

August 2015— Second Edition

MIAMI DADE COUNTY PUBLIC SCHOOLS

Rafael Treto's Goal is to Find a Job in Field of Technology

Mr. Rafael Treto is from Cuba. He moved to the United States in January 2014. In Cuba he attended the University Martha Abreu of Las Villas, where he earned a Bachelor's Degree in Telecommunication and Electronics. Mr. Treto, who loves to study, was looking for a school online, when he found The English Center and the SAVES program. He had already heard about the benefits of the SAVES program through some friends.

In August 2014, through the SAVES program, he enrolled in the Network System Administration program at The English Center. Since then, he earned the Computer Assistant diploma and his A+ Certification, which is one of the most important certification in the field. Now he is studying for the Microsoft Server 2012 Certification.

Mr. Treto said the computer program is very interesting because the instruction and the lessons are in English. That is very important for him and his development of technical vocabulary because

this course is preparing him to achieve his main goal, which is finding a job in the technology field.

The SAVES program paid his tuitions, books, and translation and validation of his university degree. Mr. Treto developed a great relationship with SAVES contacts and also with his instructor because he said "they are always giving him useful advice and informing him about choices and possibilities." Mr. Treto did not have to take English classes under SAVES. He enrolled directly in the vocational program, and this trimester (2014-3) is his last one with SAVES program. Everyone wishes him the very best.
